

TIXO

Ambient scenes and music player app

Overview

Relaxation and ambience app featuring selectable scenes (video backgrounds) and a built-in music player. Focused on a calm, immersive user experience.

Key features

- Scene catalog (e.g., forest, rain, wind, city) with quick start flow
- Fullscreen scene playback with dedicated scene pages
- Music section with track list and playback controls
- Session timer / time selection for listening sessions
- Consistent dark theme and card-based navigation

Technology / implementation

- Mobile UI/UX design and implementation
- Media playback and session timing UX
- Reusable components and clean screen structure

Screens are provided as a portfolio sample. Any client-specific branding or data can be removed upon request.
