

Work Time

Time tracking and shift management app

Overview

Mobile app for tracking work shifts with calendar history and payroll-related calculators. Designed for day-to-day use with a clean dark UI.

Key features

- Shift entry (start/end/break) with automatic hours calculation
- Monthly calendar overview and editing of entries
- Salary and contract calculators (net/gross options)
- Auto-shift option with workplace/location settings
- Profile management, settings, and in-app user guide

Technology / implementation

- Kotlin (Android)
- Jetpack Compose UI + navigation
- MVVM architecture
- Coroutines and Flow for async/reactive logic
- REST API integration (when needed)
- PDF/CSV reporting (when needed)
- Google Play release and post-release support

Screens are provided as a portfolio sample. Full demo and additional references are available on request.
